

**JOHN LAMBON'S  
GRAPHIC OF THE 76  
SQUARE MILE SITE  
FOR NAVITUS BAY**

**JOHN'S GRAPHIC GIVING A SIZE COMPARISON OF A WIND TURBINE  
ALONGSIDE THE PRIOORY CHURCH, CHRISTCHURCH**

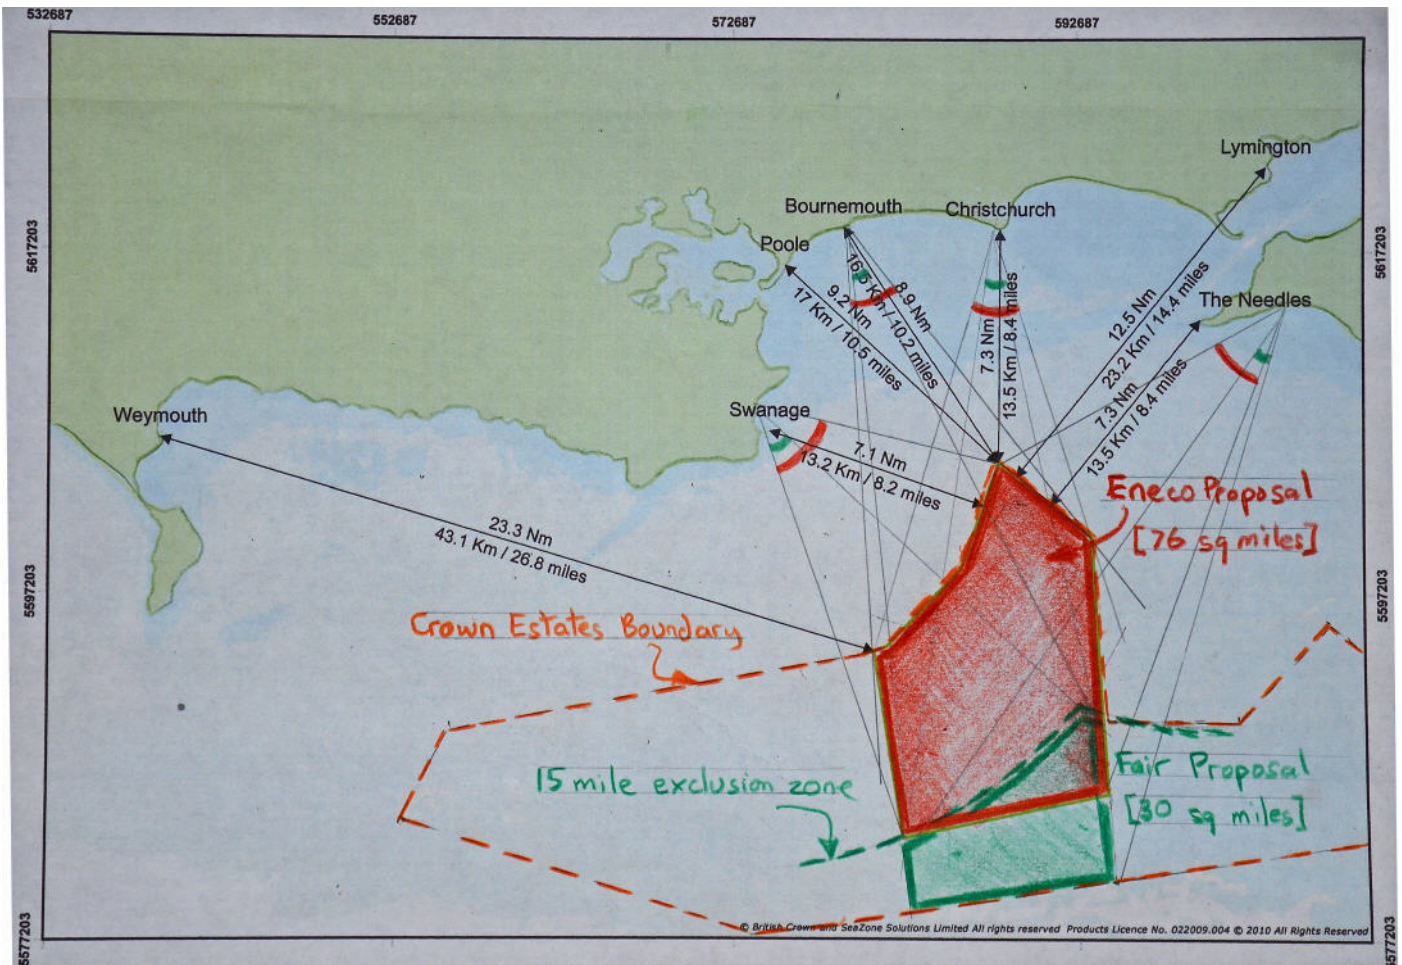

**JOHN'S GRAPHIC SHOWING THE WIND TURBINE LIKELY TO BE USED AT 205 METRES HIGH, COMPARED TO THE HEIGHT OF THE ISLES OF WIGHT AND PURBECK. SEA WIDTH IS NOT SHOWN HERE.**

## Conflicts

- Development area is just 13km from coast in the mouth of a bay – so many miles of coast affected.
- Two AONBs, a National Park and the UNESCO World Heritage site overlook from elevated positions – a highly sensitive coastline of international value.
- Diverse and sensitive local environment.
- Significant centre for tourism, based on unspoilt nature of region.
- England's busiest marine leisure area.
- Major migration route for birds.
- DECC OESEA guidelines would indicate a distance of **at least** 22km (12nm).
- Inconsistent with continental European approach to developments of this scale.

**EXTRACT FROM ANDREW LANGLEY'S POWERPOINT PRESENTATION**

**HERE IS ONE POSSIBLE COMPROMISE THAT WOULD REDUCE SIZE AND IMPACT.**

**HOWEVER, IT IS STRESSED THAT THIS WAS ONLY PROVIDED FOR DISCUSSION PURPOSES AND WAS DEFINITELY NOT VOTED AS ACCEPTABLE TO RESIDENTS' ASSOCIATIONS.**
